Chemical Properties

CAS	1799759-24-2
Formula	C ₂₇ H ₂₅ F ₄ N ₅ O ₂
MW	527.5236
Storage	
Structure	 <p>The chemical structure of BAY-588 is a complex molecule. It features a central benzimidazole ring system. One of the nitrogen atoms in the benzimidazole ring is substituted with a 4-(dimethylamino)phenyl group. The other nitrogen atom is substituted with a 2-(2-fluorophenyl)ethyl group. The benzimidazole ring is also substituted with a trifluoromethyl group and a carbonyl group. The carbonyl group is further substituted with a 2-fluorophenyl group. The overall structure is highly symmetrical and contains several fluorine atoms.</p>
