Chemical Properties

CAS	537-91-7
Formula	C ₁₂ H ₈ N ₂ O ₄ S ₂
MW	308.326
Storage	
Structure	 <p>The chemical structure shows two phenyl rings connected by a disulfide bridge (-S-S-). Each phenyl ring has a nitro group (-NO₂) attached at the para position relative to the disulfide bridge. The nitro groups are shown with their respective nitrogen and oxygen atoms and formal charges.</p>
