Structure	 <p>The chemical structure shows a complex molecule with a central amide linkage. On the left, there is a pyridine ring substituted with a chlorine atom and a methyl group. This is connected via a methylene group to a thiophene ring. The thiophene ring is further linked to a carbonyl group, which is part of a larger amide structure. This structure includes a cyclopentane ring and a cyclopropyl group. The label 'Chiral' is present near the cyclopentane ring, indicating its stereochemistry.</p>
