Chemical Properties

CAS	506-26-3
Formula	C18H30O2
MW	278.43
Storage	
Structure	 <p>The image shows the skeletal structure of gamma-Linolenic Acid. It is an 18-carbon chain with three double bonds at the 6, 9, and 12 positions, and a carboxylic acid group at the 18th carbon. The methyl end is labeled 'H3C'.</p>
