Chemical Properties

CAS	1264754-13-3
Formula	C ₁₉ H ₁₁ F ₃ N ₂ O ₄ S
MW	420.3622
Storage	
Structure	 <p>The chemical structure shows a central benzene ring substituted with a cyano group (-C≡N), a trifluoromethyl group (-CF₃), a chlorine atom (-Cl), and a methoxy group (-OCH₃). This central ring is connected via a double bond to a five-membered heterocyclic ring containing a sulfur atom and two carbonyl groups (-C=O).</p>
