Chemical Properties

CAS	25967-29-7
Formula	C ₁₉ H ₁₆ ClFN ₂ O
MW	342.8
Storage	
Structure	 <p>The chemical structure of Flutoprazepam is shown. It features a central benzimidazole ring system. One nitrogen atom of the benzimidazole is substituted with a cyclopropylmethyl group. The other nitrogen atom is substituted with a propionamide group. The 2-position of the benzimidazole ring is substituted with a 4-chlorophenyl group, and the 5-position is substituted with a 2-fluorophenyl group.</p>
