CAS	
Formula	C ₂₆ H ₄₄ N ₂ O ₄ S
MW	480.71
Storage	
Structure	 <p>The chemical structure of NCT-14b is a complex molecule. It features a central chain with a sulfur atom (S) and a nitrogen atom (N). The sulfur atom is part of a sulfonamide group (-SO₂-NH₂). The nitrogen atom is part of a secondary amine group (-NH-). The chain is substituted with a cyclohexane ring and a tert-butyl group. The structure is shown in a skeletal representation with labels for atoms and bonds.</p>
