Chemical Properties

CAS	
Formula	C ₁₄ H ₁₄ O ₃ S
MW	262.32
Storage	
Structure	 <p>The chemical structure shows a benzophenone core (a benzene ring fused to a five-membered ring with two carbonyl groups). A sulfur atom is attached to the five-membered ring, which is further connected to a propyl chain ending in a methoxy group (-OCH₃). The labels 'H-C-O' and 'H-C' are placed near the propyl chain and the sulfur atom, respectively.</p>
