Chemical Properties

CAS	
Formula	C ₂ H ₂ Cl ₂ O ₂
MW	128.94
Storage	
Structure	 <p>The image shows the chemical structure of dichloroacetic acid. It consists of a central carbon atom double-bonded to an oxygen atom and single-bonded to a hydroxyl group (HO) and a dichloromethyl group (CHCl₂). The dichloromethyl group is shown as a carbon atom bonded to two chlorine atoms (Cl) and the central carbon atom.</p>
