Chemical Properties

CAS	
Formula	C ₅ H ₆ O ₄
MW	130.1
Storage	
Structure	 <p>The chemical structure of Mesaconic acid is shown as a skeletal structure. It consists of a five-carbon chain with a double bond between the second and third carbons. The first carbon is part of a carboxylic acid group (HO-C=O). The second carbon has a methyl group (CH₃) attached. The third carbon is part of the double bond. The fourth carbon is part of another carboxylic acid group (C=O-OH). The fifth carbon is also part of a carboxylic acid group (C=O-OH).</p>
