Chemical Properties

CAS	
Formula	C ₂₈ H ₂₅ N ₃ O ₄
MW	467.53
Storage	
Structure	 <p>The image shows the chemical structure of TAMRA alkyne, 6-isomer. It is a complex polycyclic molecule consisting of a xanthene core. The xanthene core has a carbonyl group at the 9-position and a dimethylamino group at the 3-position. At the 6-position, there is a 4-ethynylphenyl group. The alkyne group is represented as -C≡CH.</p>
