Chemical Properties

CAS	
Formula	C ₂₁ H ₁₄ N ₂ O ₆
MW	390.35
Storage	
Structure	 <p>The chemical structure shows a central benzene ring substituted with a hydroxyl group (HO-), a hydrazide group (-NH-NH-), and a carboxylate group (-COO⁻). This central ring is connected to a fused bicyclic system consisting of a benzene ring and a pyridine ring, with a carbonyl group (=O) on the pyridine ring.</p>
