Chemical Properties

CAS	
Formula	C ₂₇ H ₂₇ CLN ₂ O ₆
MW	510.97
Storage	
Structure	 <p>The image shows the chemical structure of Fluorescein (FAM) amine. It consists of a fluorescein core (a xanthene ring system with two phthalate groups) attached to a long-chain primary amine group (-CH₂)₁₀-NH₂. The structure is shown as a neutral molecule with a positive charge (+) near the amine group.</p>
