Chemical Properties

CAS	
Formula	C30H40N2O2
MW	460.662
Storage	
Structure	 <p>The image shows the chemical structure of Eicosapentaenoyl Serotonin. It consists of a long, branched eicosapentaenoic acid chain (H-C at the end) attached via an amide bond to a serotonin molecule. The serotonin part includes an indole ring system with a hydroxyl group at the 5-position.</p>
