## Chemical Properties

CAS	
Formula	C <sub>25</sub> H <sub>32</sub> N <sub>3</sub> O <sub>5</sub>
MW	581.4515
Storage	
Structure	 <p>The image shows the chemical structure of RBI-257 Maleate. It consists of a maleate anion (a trans-butenedioate derivative) and a complex cationic moiety. The cationic moiety features a central nitrogen atom bonded to a phenyl ring, a piperidine ring, and a 4-iodophenyl ring. There are also hydrogen bonds indicated between the nitrogen and oxygen atoms of the maleate group.</p>
