## Chemical Properties

CAS	
Formula	C17H21N5O9S2
MW	503.5
Storage	
Structure	 <p>The chemical structure of Mesosulfuron-methyl is shown. It consists of a central benzene ring substituted with a methyl ester group (-COOCH3), a methanesulfonylmethyl group (-CH2SO2CH3), and a mesosulfuron group (-SO2NH2). The mesosulfuron group is further substituted with a methyl group (-CH3) and a methoxy group (-OCH3) on the nitrogen atom.</p>
