Chemical Properties

CAS	
Formula	C18H16CLN3O
MW	325.79
Storage	
Structure	 <p>The chemical structure shows a 5-chloro-1H-indole ring system. The indole nitrogen is bonded to a hydrogen atom. The 3-position of the indole ring is fused to a cyclohexane ring. The cyclohexane ring has a hydrogen atom at the 1-position and is bonded to a 2-pyridylmethyl group at the 2-position. The pyridine ring is labeled 'CHiral'.</p>
