Chemical Properties

CAS	
Formula	C ₆ H ₁₀ N ₂ O ₃
MW	158.15
Storage	
Structure	 <p>The chemical structure shows a five-membered pyrrolidine ring with a carbonyl group at the 2-position and a hydroxyl group at the 3-position. The hydroxyl group is labeled 'Chiral' and is shown with a wedge bond, indicating its stereochemistry. A propylamine chain is attached to the nitrogen atom of the ring.</p>
