Chemical Properties

CAS	
Formula	C ₁₀ H ₁₂ CLN ₅
MW	237.69
Storage	
Structure	 <p>The image shows the chemical structure of GMQ hydrochloride. It consists of a benzimidazole ring system with a methyl group (CH₃) at the 2-position and a guanidino group (-NH-C(=NH)-NH₂) at the 4-position. The structure is shown as a neutral base with a separate HCl molecule, indicating it is a hydrochloride salt.</p>
