Chemical Properties

CAS	
Formula	C ₂₉ H ₂₅ N ₃ O ₇
MW	527.53
Storage	
Structure	 <p>The chemical structure shows a TAMRA core (6-tetramethylrhodamine) with a succinimide group attached to the 5-position. The succinimide ring is shown in its zwitterionic form with a protonated nitrogen (NH+) and a deprotonated carbonyl oxygen (O-). The TAMRA core consists of a central carbon atom bonded to a dimethylamino group (-N(CH₃)₂), a phenyl ring, and two other rings: a benzene ring with a dimethylamino group (-N(CH₃)₂) and a pyridine ring.</p>
