Chemical Properties

CAS	
Formula	C13H11NO5
MW	261.23
Storage	
Structure	 <p>The chemical structure of Oxolinic acid is a 6,7-dihydro-2H-benzopyridin-2-one derivative. It features a benzene ring fused to a pyridinone ring. The pyridinone ring has a carbonyl group at position 2, a carboxylic acid group at position 4, and an ethyl group on the nitrogen at position 1. The benzene ring has two oxygen atoms at positions 6 and 7.</p>
