

## Certificate of Analysis

Target	Products>>Novel inhibitors
Cat.No	DC34254
Name	Naloxonazine Dihydrochloride

**Tel:** +86-21-58447131  
**Fax:** +86-21-61642470

**Email:**

## Chemical Properties

CAS	
Formula	C38H44CL2N4O6
MW	723.69
Storage	
Structure	 <p>The image shows the chemical structure of Naloxonazine Dihydrochloride. It consists of two complex polycyclic aromatic systems connected by a central nitrogen-containing bridge. Each system features multiple fused rings, including benzene and piperidine-like rings, with various substituents such as hydroxyl groups and chlorine atoms. The structure is shown as a neutral molecule with two chloride ions (Cl-) nearby, representing the dihydrochloride salt.</p>
