Structure	 <p>The chemical structure of UCF-101 is a complex molecule. It features a central pyridine ring substituted with a chlorine atom and a phenyl group. This pyridine ring is connected via a double bond to a thiopyridine ring, which also has a chlorine atom and a phenyl group. The thiopyridine ring is further linked to a thiophene ring, which is substituted with a chlorine atom and a nitro group. The thiophene ring is also connected to a benzene ring with a nitro group.</p>
