Chemical Properties

CAS	
Formula	C ₂₃ H ₂₀ CLN ₃ O
MW	389.88
Storage	
Structure	 <p>The chemical structure shows a central benzimidazole ring system. One of the benzimidazole nitrogen atoms is substituted with a 2,6-dimethylphenyl group. The 2-position of the benzimidazole ring is substituted with a 4-(chloromethyl)phenyl group. The 5-position of the benzimidazole ring is substituted with a benzamide group, where the amide nitrogen is further substituted with a 4-chlorophenylmethyl group.</p>
