Chemical Properties

CAS	
Formula	C ₂₂ H ₂₆ Cl ₂ N ₄ O ₃ S
MW	497.43
Storage	
Structure	 <p>The image shows the chemical structure of NBI-35965 Mesylate. It consists of a central benzimidazole ring system. One nitrogen of the benzimidazole is substituted with a 2,4-dichlorophenyl group. The other nitrogen is substituted with a propyl chain that is further substituted with a cyclopropylmethyl group. The nitrogen atom of this propyl chain is also substituted with a mesylate group (CH₃SO₃⁻).</p>
