Chemical Properties

CAS	
Formula	C ₁₈ H ₂₂ O ₅
MW	318.36
Storage	
Structure	 <p>The image shows the chemical structure of Zearalenone, a sesquiterpene lactone. It consists of a decalin core with a lactone ring fused to one of the rings. The decalin ring has a methyl group and a hydroxyl group on one ring, and a hydroxyl group on the other ring. The lactone ring is fused to the decalin ring. The structure is labeled with 'CH₃' and 'OH' groups, and the word 'Chiral' is written above the methyl group.</p>
