## Chemical Properties

CAS	
Formula	C <sub>12</sub> H <sub>9</sub> NO <sub>6</sub>
MW	263.2
Storage	
Structure	 <p>The chemical structure shows a central trans-stilbene-like core. The left phenyl ring is substituted with a nitro group (-NO<sub>2</sub>) at the para position. The right phenyl ring is substituted with a methyl ester group (-COOCH<sub>3</sub>) at the para position. The two phenyl rings are connected by a trans-alkene bridge.</p>
