## Chemical Properties

CAS	
Formula	C <sub>19</sub> H <sub>21</sub> N <sub>5</sub> O <sub>3</sub>
MW	367.4
Storage	
Structure	 <p>The chemical structure shows a central benzene ring with a nitro group (-NO<sub>2</sub>) at the para position and a 2-((4-aminophenyl)amino)propanoate group at the other para position. The amino group is part of a propanoate chain, which is further substituted with a methyl group and a methylamino group.</p>
