Chemical Properties

CAS	
Formula	C ₂₉ H ₃₆ ClNO ₂
MW	466.06
Storage	
Structure	 <p>The image shows the chemical structure of UK-78282 Hydrochloride. It consists of a central piperazine ring. One nitrogen atom of the piperazine is substituted with a 4-(4-chlorophenyl)butyl group. The other nitrogen atom is substituted with a 2-(2-phenylphenyl)ethyl group. The hydrochloride counterion is shown as H⁺ and Cl⁻.</p>
