Chemical Properties

CAS	
Formula	C ₁₈ H ₁₄ F ₅ NO ₃ S
MW	419.36
Storage	
Structure	 <p>The chemical structure shows a central amide bond connecting two rings. On the left is a bicyclic system consisting of a seven-membered ring fused to a five-membered ring, with a chlorine atom and a methyl ester group attached to the five-membered ring. On the right is a benzene ring substituted with four fluorine atoms and a carbonyl group.</p>
