Chemical Properties

CAS	
Formula	C ₁₀ H ₁₂ N ₅ Na ₃ O ₁₀ P ₂
MW	493.14
Storage	
Structure	 <p>The image shows the chemical structure of ADP Sodium Salt. It consists of a central adenosine diphosphate (ADP) molecule. The adenosine part is a purine ring system (adenine) attached to a ribose sugar. The ribose sugar is further attached to a diphosphate group. The diphosphate group is shown as a chain of two phosphate groups, with the terminal phosphate group being a triphosphate group. The structure is surrounded by three sodium ions (Na⁺) and a chloride ion (Cl⁻), indicating it is a sodium salt. The overall structure is shown in a ball-and-stick representation with labels for atoms and ions.</p>
