## Chemical Properties

CAS	
Formula	C <sub>15</sub> H <sub>14</sub> O <sub>7</sub>
MW	306.27
Storage	
Structure	 <p>The chemical structure shows a central benzene ring with three hydroxyl groups (H-O) at the 1, 2, and 4 positions. This ring is connected via a carbonyl group (C=O) to a methylene group (-CH<sub>2</sub>-), which is further connected to a furan ring. The furan ring is substituted with a propyl ester group (-COOCH<sub>2</sub>CH<sub>2</sub>CH<sub>3</sub>) at the 2-position.</p>
