

## Certificate of Analysis

Target	Products>>Novel inhibitors
Cat.No	DC34597
Name	Naphthol AS-TR phosphate

**Tel:** +86-21-58447131

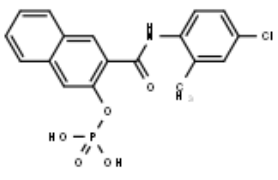

**Fax:** +86-21-61642470

## Chemical Properties

CAS	
Formula	C18H15CLNO5P
MW	391.74
Storage	
Structure	 <p>The chemical structure shows a naphthalene ring system with a phosphate group at the 1-position and a 4-chlorophenylacetamide group at the 6-position. The phosphate group is shown as a phosphorus atom bonded to three hydroxyl groups and one oxygen atom that is part of the naphthalene ring. The 4-chlorophenylacetamide group consists of a benzene ring with a chlorine atom at the para position and an acetamide group (-NH-C(=O)-) at the other para position, which is attached to the naphthalene ring at the 6-position.</p>
Purity
