Chemical Properties

CAS	
Formula	C ₂₂ H ₂₆ O ₇
MW	402.44
Storage	
Structure	 <p>The chemical structure of Arzanol is a complex polycyclic molecule. It features a central benzene ring substituted with a methyl group, a hydroxyl group, and a chlorine atom. This benzene ring is connected via a methylene bridge to a five-membered ring containing a chlorine atom and a hydroxyl group. Another branch from this five-membered ring leads to a six-membered ring with a chlorine atom and a hydroxyl group. A side chain containing a double bond and two methyl groups is also attached to the structure.</p>
