Chemical Properties

CAS	
Formula	C ₂₂ H ₃₇ NO ₃
MW	363.542
Storage	
Structure	 <p>The chemical structure shows a long alkyl chain (12 carbons) attached to a central carbon atom. This central carbon is also bonded to a carbonyl group (C=O), a hydroxyl group (OH), and a chiral auxiliary group (Diphenylmethyl, DMP). The auxiliary group consists of a central carbon bonded to two phenyl rings and a hydrogen atom.</p>
