## Chemical Properties

CAS	
Formula	C <sub>12</sub> H <sub>10</sub> O <sub>4</sub>
MW	218.21
Storage	
Structure	 <p>The chemical structure of Acifran is a five-membered heterocyclic ring containing one oxygen atom. It features a phenyl group attached to the ring, a methyl group (CH<sub>3</sub>) attached to the carbon adjacent to the oxygen, and a carboxylic acid group (-COOH) attached to the carbon adjacent to the carbonyl group. The ring also contains a carbonyl group (=O).</p>
