Chemical Properties

CAS	
Formula	C ₁₂ H ₁₂ N ₂ O ₆
MW	280.24
Storage	
Structure	 <p>The chemical structure shows a central 1,3-bis(4-oxo-2-pentylideneamino)propane moiety. One of the pentylideneamino groups is substituted with a methyl group, forming a 2-methyl-2-pentylideneamino group. The other is a 2-pentylideneamino group. The two pentylideneamino groups are connected via their nitrogen atoms to a central propanoate chain.</p>
