Chemical Properties

CAS	
Formula	C ₈ H ₁₈ CLN ₃
MW	191.703
Storage	
Structure	 <p>The chemical structure shows a 3-(3-dimethylamino)propyl carbodiimide hydrochloride molecule. It consists of a central carbonyl group (C=O) bonded to a nitrogen atom (N), which is further bonded to a propyl chain. The propyl chain is terminated by a dimethylamino group (N(CH₃)₂). The counterion is a chloride ion (Cl⁻).</p>
