Chemical Properties

CAS	
Formula	C ₈ H ₁₄ O ₇
MW	222.19
Storage	
Structure	 <p>The image shows the chemical structure of PEG3-(CH₂CO₂H)₂. It consists of a central polyethylene glycol (PEG) chain of three units, represented as -O-CH₂-CH₂-O-CH₂-CH₂-O-CH₂-CH₂-. Each of the two terminal oxygen atoms is bonded to a -CH₂-CO₂H group. The carboxylic acid groups are shown in a skeletal structure with the carbonyl oxygen double-bonded to the carbon, and the hydroxyl group single-bonded to the same carbon. The terminal carbons of the PEG chain are also bonded to hydrogen atoms.</p>
