Chemical Properties

CAS	
Formula	C ₁₆ H ₃₂ N ₂ O ₆
MW	348.44
Storage	
Structure	 <p>The image shows the chemical structure of Boc-NH-PEG2-NH-Boc. It consists of two tert-butoxycarbonyl (Boc) groups connected to a polyethylene glycol (PEG) chain of two units. The structure is symmetrical, with the PEG chain in the center and the Boc groups at the ends. The Boc groups are represented as tert-butyl groups attached to a carbonyl group, which is further attached to a nitrogen atom. The PEG chain is represented as a chain of oxygen and ethylene groups.</p>
