Chemical Properties

CAS	
Formula	C ₁₀ H ₁₉ NO ₄ S ₂
MW	281.39
Storage	
Structure	 <p>The chemical structure shows a tert-butyl group (C(CH₃)₃) attached to a carbonyl group (C=O), which is further attached to a nitrogen atom (NH). This nitrogen is connected to an ethyl chain (CH₂-CH₂), which is linked to a disulfide bridge (S-S). The other end of the disulfide bridge is connected to a propionic acid chain (CH₂-CH₂-COOH).</p>
