Chemical Properties

CAS	
Formula	C ₉ H ₁₉ NO ₄ S ₂
MW	269.37
Storage	
Structure	 <p>The chemical structure shows a tert-butyl ester group (Boc) attached to a propanoic acid derivative. The propanoic acid part is linked via an ester bond to an ethyl chain, which is further connected to a disulfide bridge (-S-S-). The second sulfur atom is attached to another ethyl chain that terminates in a primary alcohol group (-OH).</p>
