Chemical Properties

CAS	
Formula	C13H13F5O5
MW	344.23
Storage	
Structure	 <p>The chemical structure shows a central benzene ring with five fluorine atoms (F) attached at the 1, 2, 3, 4, and 6 positions. A carboxylate group (-COOH) is attached at the 5-position. The carboxylate group is linked to a polyethylene glycol (PEG) chain consisting of two repeating units of -CH2-CH2-O-CH2-CH2-O- and a terminal hydroxyl group (-OH).</p>
