Chemical Properties

CAS	
Formula	C12H15NO7
MW	285.25
Storage	
Structure	 <p>The chemical structure shows a triethylene glycol chain (HO-CH₂-CH₂-O-CH₂-CH₂-O-CH₂-CH₂-O-CH₂-CH₂-OH) where one hydroxyl group is converted to a carbonate group (-O-C(=O)-O-). This carbonate group is linked to a 4-nitrophenyl ring, which has a nitro group (-NO₂) at the para position relative to the carbonate linkage.</p>
