Chemical Properties

CAS	
Formula	C ₈ H ₁₈ BrO ₃ P
MW	273.11
Storage	
Structure	 <p>The chemical structure shows a phosphorus atom (P) double-bonded to an oxygen atom (O) and single-bonded to two ethoxy groups (-OCH₂CH₃). The phosphorus atom is also single-bonded to a 4-bromobutyl chain, which consists of a four-carbon chain with a bromine atom (Br) at the end.</p>
