## Chemical Properties

CAS	63644-62-2
Formula	C <sub>20</sub> H <sub>20</sub> O <sub>6</sub>
MW	356.37
Storage	4°C for 1 year, -20°C for more than 2 years
Structure	 <p>The image shows the chemical structure of coniferyl ferulate, which is a diester of ferulic acid and coniferyl alcohol. It consists of two feruloyl groups linked by an ester bond. Each feruloyl group is derived from ferulic acid, which has a phenyl ring with a hydroxyl group at the 3-position and a propenoic acid side chain at the 1-position. The structure is shown in a skeletal format with labels for the hydroxyl groups and the ester linkage.</p>
Purity	>98%, Standard References Grade
