## Chemical Properties

CAS	76474-56-1
Formula	C <sub>21</sub> H <sub>22</sub> O <sub>6</sub>
MW	370.3958
Storage	4°C for 1 year, -20°C for more than 2 years
Structure	 <p>The image shows the chemical structure of Dihydrocurcumin, which is a bisphenol derivative. It consists of two 3,4-dihydroxyphenyl rings connected by a central chain. The chain includes a trans-double bond, a carbonyl group, and a methylene group. The structure is shown in a skeletal format with explicit hydrogen and oxygen atoms.</p>
Purity	>98%, Standard References Grade
