Chemical Properties

CAS	
Formula	
MW	
Storage	2 years -20°C Powder, 2 weeks 4°C in DMSO, 6 months -80°C in DMSO
Structure	 <p>The chemical structure shows a central pyrrolidine ring. One nitrogen of the pyrrolidine is substituted with a tert-butyl group and a primary amine group (H₂N). The other nitrogen is substituted with a hydroxyl group (OH) and a carbonyl group (C=O). This carbonyl group is part of an amide linkage to a chiral center, which is further substituted with a hydrogen atom (H) and a phenyl ring. The phenyl ring is substituted at the para position with a thiazole ring. Below the structure, the text 'HCl' is written twice, indicating the dihydrochloride salt form.</p>
Purity	>98%
