Chemical Properties

CAS	23526-45-6
Formula	C ₁₃ H ₂₀ O ₃
MW	224.30
Storage	Please store the product under the recommended conditions in the Certificate of Analysis.
Structure	 <p>The chemical structure of Vomifoliol is a bicyclic molecule. It features a six-membered ring with a ketone group (=O) and a methyl group (CH₃) at the 2-position. A side chain is attached to the ring, containing a double bond and a chiral center. The chiral center is labeled 'Chiral' and has a methyl group (CH₃) and a hydroxyl group (OH) attached to it. The structure is shown with stereochemistry: a methyl group (H₃C) is on a wedge, a hydroxyl group (OH) is on a dash, and the chiral center has a methyl group (CH₃) on a wedge and a hydroxyl group (OH) on a dash.</p>
Purity	>98%
