| Structure |  <p>The chemical structure of Deoxylapachol is shown. It consists of a benzene ring fused to a six-membered ring containing two carbonyl groups (C=O). A prop-1-en-2-yl side chain is attached to the six-membered ring. The side chain is drawn as a double bond between the ring and a CH group, which is further bonded to a CH₂ group. Two hydrogen atoms are explicitly shown on the terminal carbon of the side chain.</p> |
